Fizika

9-sinf

Mavzu: Ho‘llash. Kapillyar hodisalar.

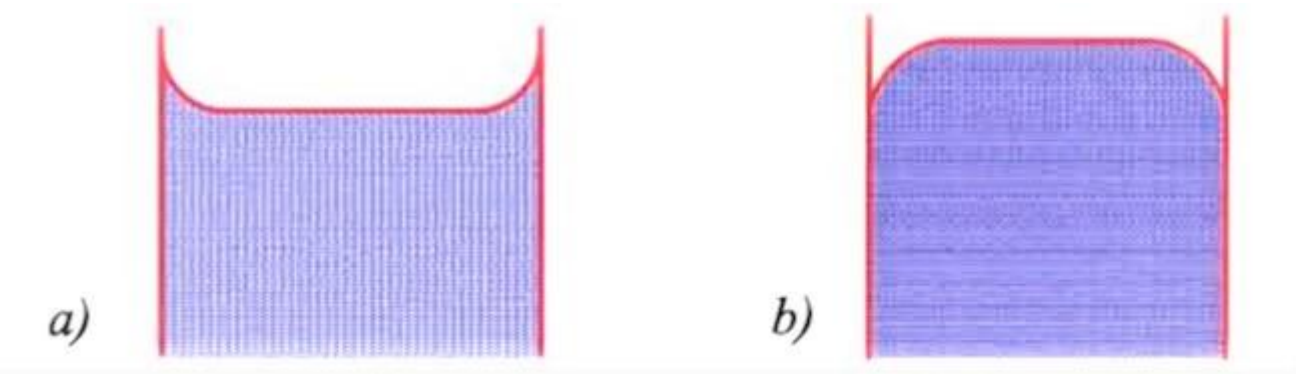

Ho‘llash va ho‘llamaslik

Suyuqlik va qattiq jism molekulalari orasidagi tortishish kuchlari suyuqlik molekulalarining o‘zaro tortishish kuchlaridan katta bo‘lsa, suyuqlik qattiq jism sirtini ho‘llaydi.

Suyuqlik va qattiq jism molekulalari orasidagi tortishish kuchlari suyuqlik molekulalarining o‘zaro tortishish kuchlaridan kichik bo‘lsa, suyuqlik qattiq jism sirtini ho‘llamaydi.

Suyuqlik sirtining egrilanishi

Qattiq jism sirtida suyuqlik sirtining egrilanishiga sabab bo‘ladigan hodisa ho‘llash yoki ho‘llamaslik hodisasiga bog‘liqdir.

Tabiatda ho‘llash va ho‘llamaslik

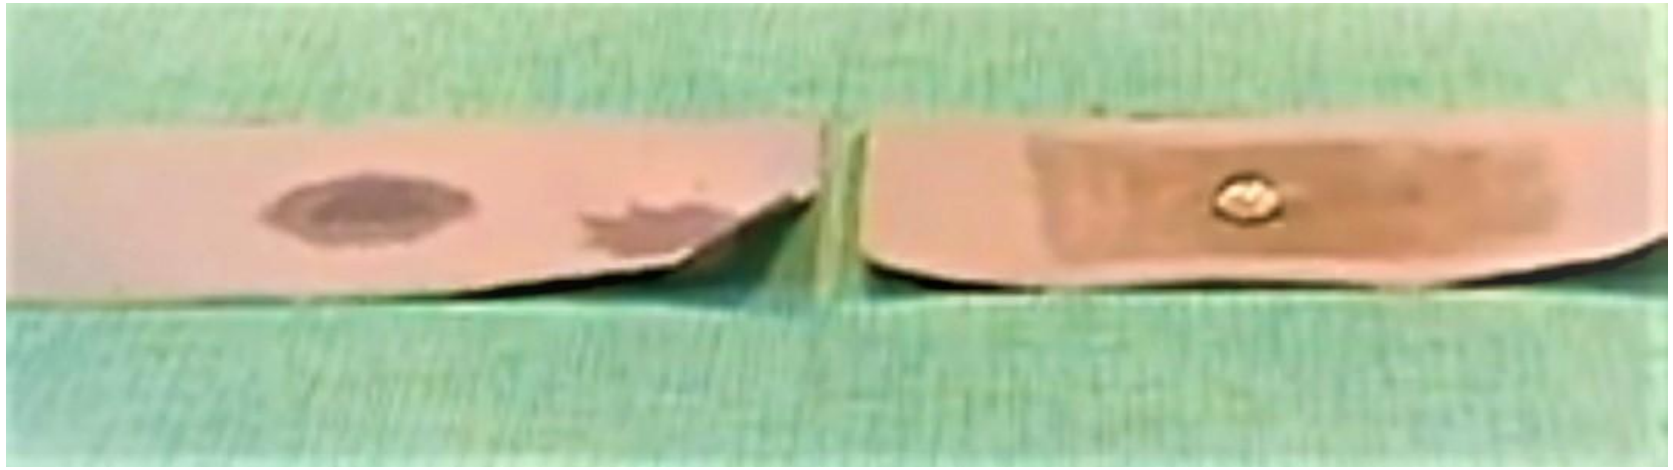

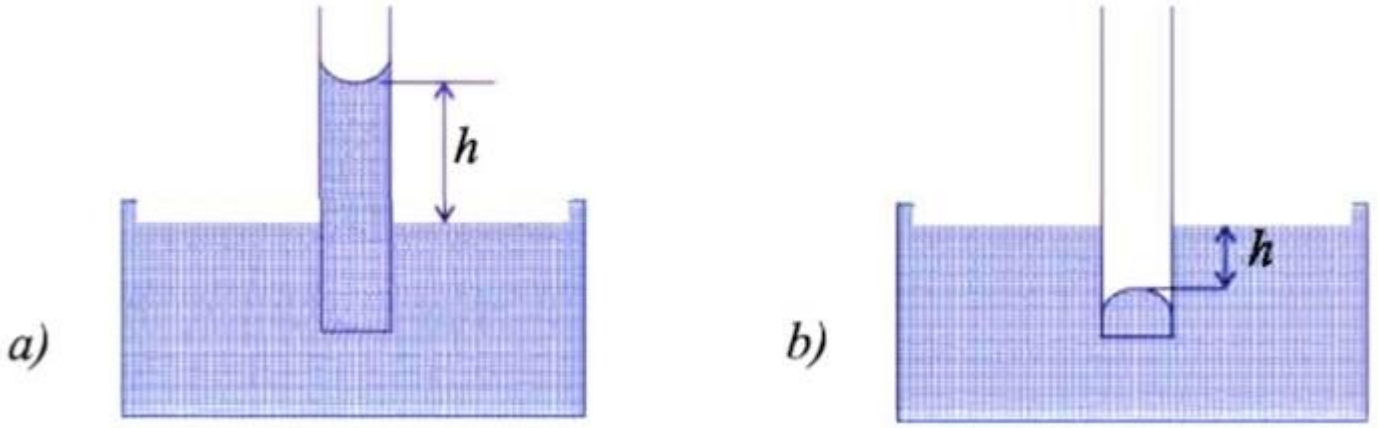

Tajribalar

Ho‘llash va ho‘llamaslikka doir juda ko‘p tajribalar o‘tkazish mumkin.

Kapillyar hodisalar

Diametri juda kichik naylar kapillyarlar deyiladi.

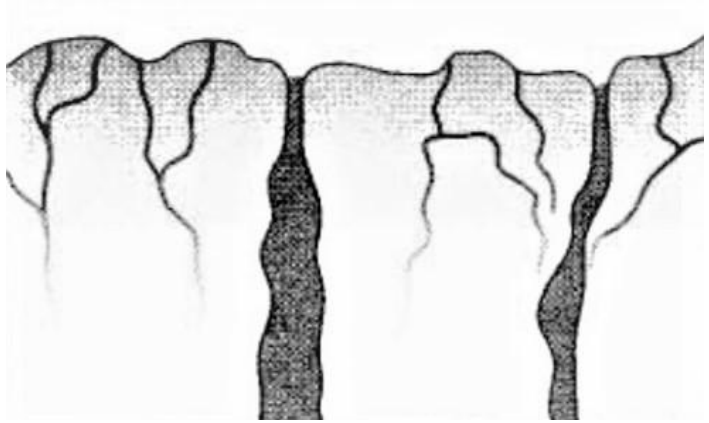

$$F = \sigma l = \sigma 2\pi r \qquad \sigma 2\pi r = mg$$

$$h = \frac{2\sigma}{\rho_s r g}$$

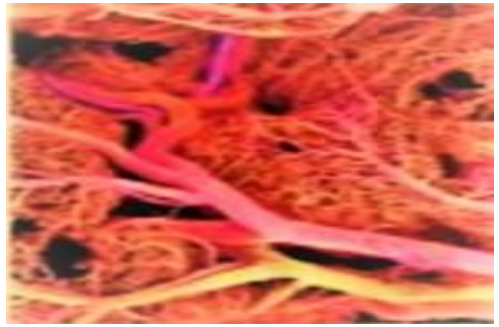

Tabiatda va texnikada kapillyar hodisalar

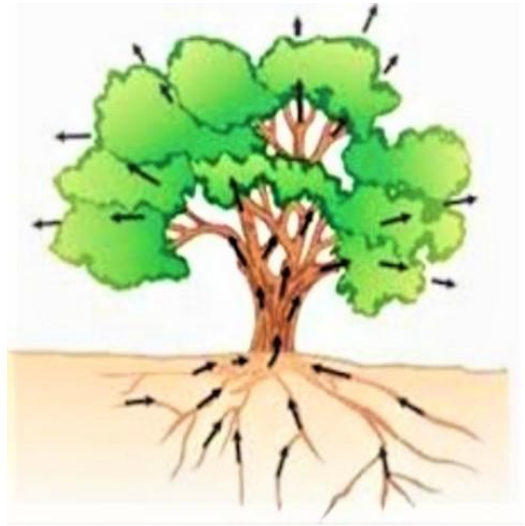

Kapillyarlik hodisalari tabiatda va texnikada katta ahamiyatga ega.

Tajribalar

Mustaqil bajarish uchun topshiriqlar

1. Mavzuni o‘qing va mavzuga doir savollarga javob yozing.(100-bet)

2. ***Amaliy topshiriq:*** idishga suv soling. Mato olib undan ingichka tasma yasang. Tasmaning bir uchini idishdagi suvga tushiring, ikkinchi uchini tuvakdagi gul tagiga qo‘ying. Suvning asta-sekin gul tagiga tomayotganini kuzating.

Savol: Qanday qurilma yasadingiz?

Tajriba asosida xulosa yozing.
