9-sinf

Laboratoriya ishi №4

Mavzu: **Havoning nisbiy namligini aniqlash**.

Dars rejasi

Laboratoriya ishini bajarishda texnika xavfsizligi qoidalari bilan tanishish

Laboratoriya ishini bajarishda kerakli bo‘lgan jihozlar bilan tanishish

Laboratoriya ishini tajribada ko‘rsatish

Ishning maqsadi

- Havoning namligini tajribada aniqlashni o‘rganish.

Kerakli jihozlar

- Avgust psixrometri (yoki ikkita bir xil termometr), suv solinadigan idish va doka.

Ishni bajarish tartibi

1. Psixrometr idishchasiga suv soling va 4-5 daqiqa kuting.

2. Quruq va ho‘l termometrlar ko‘rsatishlarini yozib oling.

3. Quruq va ho‘l termometrlarning ko‘rsatishlarining farqini hisoblang. $\Delta t = t - t_h$

4. Psixrometrik jadvaldan quruq termometrning t ko‘rsatishiga va Δt ga mos kelgan nisbiy namlikni belgilang.

5. Jadvaldan foydalanib xonadagi absolyut namlikni aniqlang.

6. Tajriba natijalarini jadvalga yozing.

Mustaqil bajarish uchun topshiriqlar

1. Mavzuga oid savollarga javob yozing. (124-bet)

2. Laboratoriya ishi natijalarini tahlil qiling va xulosa yozing.
